

## Workshop setup instructions

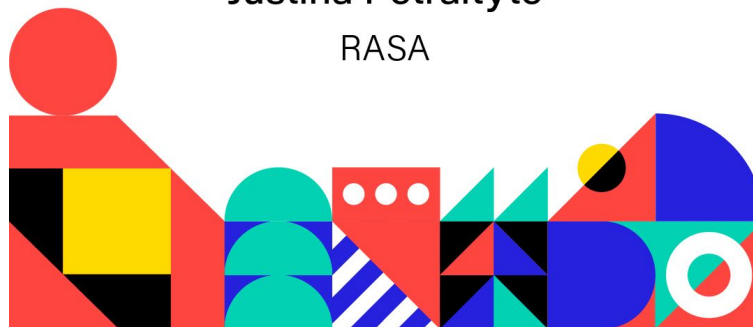

6th June  
11:00–13:00

WORKSHOP

# Building AI assistants that scale using machine learning and open source tools

Justina Petraityte

RASA

The attendees of this workshop are encouraged to follow along throughout the session. There will be some time allocated for setting up the working environment, but if you want to be ready in advance, here are the requirements:

- Python 3
- Rasa and Rasa X installed. You can install them both using the command below:

```
pip install rasa-x --extra-index-url https://pypi.rasa.com/simple
```

- One of the steps will include using ngrok. It's an optional step, but if you want to follow along, make sure to download ngrok as well: <https://ngrok.com/download>

If you encounter any issues while installing Rasa, feel free to send an email to Justina at [juste@rasa.com](mailto:juste@rasa.com)
